Information we will need prior to install:

Username: _____ @howardelectricwb.com

Password: _____ (you may change this later if you wish)

   Must be a min of 8 characters, have at least 1 lower and 1 uppercase letter, 1 numeric and 1 special character

Package Choice: _____ (Bronze 12, Silver 25, Gold 30/50)

How many computers/devices? _____

Operating System? _____ (Windows XP, Wind-10, MAC 0S10...)

Type of install you prefer: (circle one)   Pole Mount   Retaining Wall   5x5 Deck Post   Roof Mount

   We recommend a Pole Mount for a good, sturdy mount. Pole Mount is $45, Roof Mount is $150

Does your computer(s) have an Ethernet port? _____ (looks like a wide phone jack on the back of your hard-drive/tower…**this is a must before install is able to be completed**. If computer does not have one, an Ethernet card or adapter can be installed, which are available at most computer stores.)

Daytime phone # _____

Additional email accounts (optional)

Username: _____   Password: _____

Username: _____   Password: _____

If you have a general email account (hotmail, gmail, etc) that you would like to continue to use and want us to forward any correspondence to, please enter that email here:

   _____

If you need a VPN (Virtual Private Network) for a business, ViaSat does not support this, but in most instances, it will work. Please call beforehand to determine if Viasat will work in your situation.

If you have a concrete wing-wall or basement foundation, this works well for mounting the dish, granted we have a clear view south. We try to avoid roof mounts and we will not mount the dish on a utility pole. Most of our installs are done by us mounting one of our 2" galvanized poles in concrete. This makes for a good, sturdy install.
